

# CERTIFICATE

Certified Passive House Component

Component-ID 0521wi03 valid until 31st December 2018

Passive House Institute  
Dr. Wolfgang Feist  
64283 Darmstadt  
Germany

Category: **Window Frame**  
Manufacturer: **Hubert Fosodeder e.U.,  
Gaspoltshofen,  
Austria**  
Product name: **Alto Nova 0.74 System 10+12**

**This certificate was awarded based on the following  
criteria for the cool, temperate climate zone**

Comfort  $U_W = 0.80 \leq 0.80 \text{ W}/(\text{m}^2 \text{ K})$   
 $U_{W,\text{installed}} \leq 0.85 \text{ W}/(\text{m}^2 \text{ K})$   
with  $U_g = 0.70 \text{ W}/(\text{m}^2 \text{ K})$

Hygiene  $f_{Rsi=0.20} \geq 0.70$

cool, temperate climate

**CERTIFIED  
COMPONENT**

Passive House Institute

### Description

Timber frame with insulation and external aluminium shell; Pane thickness: 44 mm (4/16/4/16/4)

### Explanation

The window U-values were calculated for the test window size of 1.23 m × 1.48 m with  $U_g = 0.70 \text{ W}/(\text{m}^2 \text{ K})$ . If a higher quality glazing is used, the window U-values will improve as follows:

Glazing	$U_g =$	0.70	0.64	0.58	0.53	$\text{W}/(\text{m}^2 \text{ K})$
		↓	↓	↓	↓	
Window	$U_W =$	0.80	0.76	0.72	0.69	$\text{W}/(\text{m}^2 \text{ K})$

Transparent building components are classified into efficiency classes depending on the heat losses through the opaque part. The frame U-Values, frame widths, thermal bridges at the glazing edge, and the glazing edge lengths are included in these heat losses. A more detailed report of the calculations performed in the context of certification is available from the manufacturer.

The Passive House Institute has defined international component criteria for seven climate zones. In principle, components which have been certified for climate zones with higher requirements may also be used in climates with less stringent requirements. In a particular climate zone it may make sense to use a component of a higher thermal quality which has been certified for a climate zone with more stringent requirements.

Further information relating to certification can be found on [www.passivehouse.com](http://www.passivehouse.com) and [passipedia.org](http://passipedia.org).

Frame values			Frame width $b_f$ mm	$U$ -value frame $U_f$ W/(m <sup>2</sup> K)	$\Psi$ -panel edge $\Psi_g$ W/(m K)	Temp. Factor $f_{Rsi=0.20}$ [-]
Top	(to)		130	0.74	0.036	0.74
Side	(s)		130	0.74	0.036	0.74
Bottom	(bo)		130	0.74	0.036	0.74
			Spacer: Thermix TX.N plus		Secondary seal: Polysulfide	

### Validated installations

Insulated formwork blocks		Timber frame		Exterior insulation and finishing system	
$U_{Wall} = 0.14 \text{ W/(m}^2 \text{ K)}$		$U_{Wall} = 0.14 \text{ W/(m}^2 \text{ K)}$		$U_{Wall} = 0.13 \text{ W/(m}^2 \text{ K)}$	
					
$\Psi_{install}$	W/(m K)	$\Psi_{install}$	W/(m K)	$\Psi_{install}$	W/(m K)
Top	0.005	Top	0.007	Top	0.016
Side	0.005	Side	0.007	Side	0.016
Bottom	0.015	Bottom	0.015	Bottom	0.028
$U_{W,installed} = 0.82 \text{ W/(m}^2 \text{ K)}$		$U_{W,installed} = 0.83 \text{ W/(m}^2 \text{ K)}$		$U_{W,installed} = 0.86 \text{ W/(m}^2 \text{ K)}$
