

# CERTIFICATE

Certified Passive House Component

Component-ID 0688wi03 valid until 31st December 2017

Passive House Institute  
Dr. Wolfgang Feist  
64283 Darmstadt  
Germany

Category: **Window frame**  
Manufacturer: **Krone Vinduer A/S,  
Vra,  
Denmark**  
Product name: **HeaCO Wood O**

**This certificate was awarded based on the following  
criteria for the cool, temperate climate zone**

Comfort  $U_W = 0.80 \leq 0.80 \text{ W}/(\text{m}^2 \text{ K})$   
 $U_{W,\text{installed}} \leq 0.85 \text{ W}/(\text{m}^2 \text{ K})$   
with  $U_g = 0.70 \text{ W}/(\text{m}^2 \text{ K})$

Hygiene  $f_{Rsi=0.25} \geq 0.70$

**CERTIFIED  
COMPONENT**

Passive House Institute

Calculation model

Isothermal

### Description

Timber frame (0,11 W/(m<sup>2</sup>K)) with insulation (Heaco Wood 0,55 W/(m<sup>2</sup>K), PUR 0,031 W/(m<sup>2</sup>K) ) and external aluminium shell. Pane thickness: 52 mm (6/18/4/18/6), Rebate depth: 12 mm.

### Explanation

The window U-values were calculated for the test window size of 1.23 m × 1.48 m with  $U_g = 0.70$  W/(m<sup>2</sup> K). If a higher quality glazing is used, the window U-values will improve as follows:

Glazing	$U_g =$	0.70	0.64	0.58	0.54	W/(m <sup>2</sup> K)
		↓	↓	↓	↓	
Window	$U_W =$	0.80	0.76	0.71	0.68	W/(m <sup>2</sup> K)

Transparent building components are classified into efficiency classes depending on the heat losses through the opaque part. The frame U-Values, frame widths, thermal bridges at the glazing edge, and the glazing edge lengths are included in these heat losses. A more detailed report of the calculations performed in the context of certification is available from the manufacturer.

The Passive House Institute has defined international component criteria for seven climate zones. In principle, components which have been certified for climate zones with higher requirements may also be used in climates with less stringent requirements. In a particular climate zone it may make sense to use a component of a higher thermal quality which has been certified for a climate zone with more stringent requirements.

Further information relating to certification can be found on [www.passivehouse.com](http://www.passivehouse.com) and [passipedia.org](http://passipedia.org).

Frame values			Frame width $b_f$ mm	$U$ -value frame $U_f$ W/(m <sup>2</sup> K)	$\Psi$ -glass edge $\Psi_g$ W/(m K)	Temp. Factor $f_{Rsi=0.25}$ [-]
Top	(to)		91	0.81	0.028	0.73
Side	(s)		91	0.81	0.028	0.73
Bottom	(bo)		91	0.82	0.028	0.73
Transom 1 casement	(t1)		154	0.88	0.028	0.73
			Spacer: SWISSPACER Ultimate		Secondary seal: Polysulfide	

## Validated installations

Timber frame		EIFS		Cavity wall (operable)	
					
$\Psi_{install}$	W/(m K)	$\Psi_{install}$	W/(m K)	$\Psi_{install}$	W/(m K)
Top	0.014	Top	0.008	Top	0.017
Side	0.014	Side	0.008	Side	0.017
Bottom	0.023	Bottom	0.012	Bottom	0.020
$U_{W,installed} = 0.85$ W/(m <sup>2</sup> K)		$U_{W,installed} = 0.83$ W/(m <sup>2</sup> K)		$U_{W,installed} = 0.85$ W/(m <sup>2</sup> K)
