

CERTIFICATE

Certified Passive House Component

Component-ID 1448wi03 valid until 31st December 2020

Passive House Institute
Dr. Wolfgang Feist
64283 Darmstadt
Germany

Category: **Window Frame**
Manufacturer: **Europa Profil SA,
Inofita, Viotia,
Greece**
Product name: **EOS 90 PH**

**This certificate was awarded based on the following
criteria for the cool, temperate climate zone**

Comfort $U_W = 0.75 \leq 0.80 \text{ W}/(\text{m}^2 \text{ K})$
 $U_{W,\text{installed}} \leq 0.85 \text{ W}/(\text{m}^2 \text{ K})$
with $U_g = 0.70 \text{ W}/(\text{m}^2 \text{ K})$

Hygiene $f_{Rsi=0.25} \geq 0.70$

**CERTIFIED
COMPONENT**

Passive House Institute

Calculation model

Isothermal

Description

Aluminium frame (160 W/(mK)) insulated with aerogel (0,016 W/(mK)) and thermally separated using low-lambda polyamide with 25% glass fibre (0,21 W/(mK)). Glazing: 4/18/4/18/4 mm. Spacer: Multitech 18 mm with butyl secondary seal.

Explanation

The window U-values were calculated for the test window size of 1.23 m × 1.48 m with $U_g = 0.70 \text{ W}/(\text{m}^2 \text{ K})$. If a higher quality glazing is used, the window U-values will improve as follows:

Glazing	$U_g =$	0.70	0.64	0.58	0.52	W/(m ² K)
		↓	↓	↓	↓	
Window	$U_w =$	0.75	0.71	0.68	0.64	W/(m ² K)

Transparent building components are classified into efficiency classes depending on the heat losses through the opaque part. The frame U-Values, frame widths, thermal bridges at the glazing edge, and the glazing edge lengths are included in these heat losses. A more detailed report of the calculations performed in the context of certification is available from the manufacturer.

The Passive House Institute has defined international component criteria for seven climate zones. In principle, components which have been certified for climate zones with higher requirements may also be used in climates with less stringent requirements. In a particular climate zone it may make sense to use a component of a higher thermal quality which has been certified for a climate zone with more stringent requirements.

Further information relating to certification can be found on www.passivehouse.com and passipedia.org.

Frame values			Frame width b_f mm	U -value frame U_f W/(m ² K)	Ψ -panel edge Ψ_g W/(m K)	Temp. Factor $f_{Rsi=0.25}$ [-]
Top	(to)		150	0.70	0.022	0.77

			Spacer: MULTITECH		Secondary seal: Butyl	

Validated installations

Cavity wall

$U_{Wall} = 0.13 \text{ W/(m}^2 \text{ K)}$

$\Psi_{install}$	W/(m K)
Top	0.021
Side	0.021
Bottom	0.029

$U_{W,installed} = 0.82 \text{ W/(m}^2 \text{ K)}$

Exterior insulation and finishing system

$U_{Wall} = 0.14 \text{ W/(m}^2 \text{ K)}$

$\Psi_{install}$	W/(m K)
Top	0.014
Side	0.014
Bottom	0.023

$U_{W,installed} = 0.80 \text{ W/(m}^2 \text{ K)}$

Insulated formwork blocks

$U_{Wall} = 0.15 \text{ W/(m}^2 \text{ K)}$

$\Psi_{install}$	W/(m K)
Top	0.014
Side	0.014
Bottom	0.023

$U_{W,installed} = 0.80 \text{ W/(m}^2 \text{ K)}$
