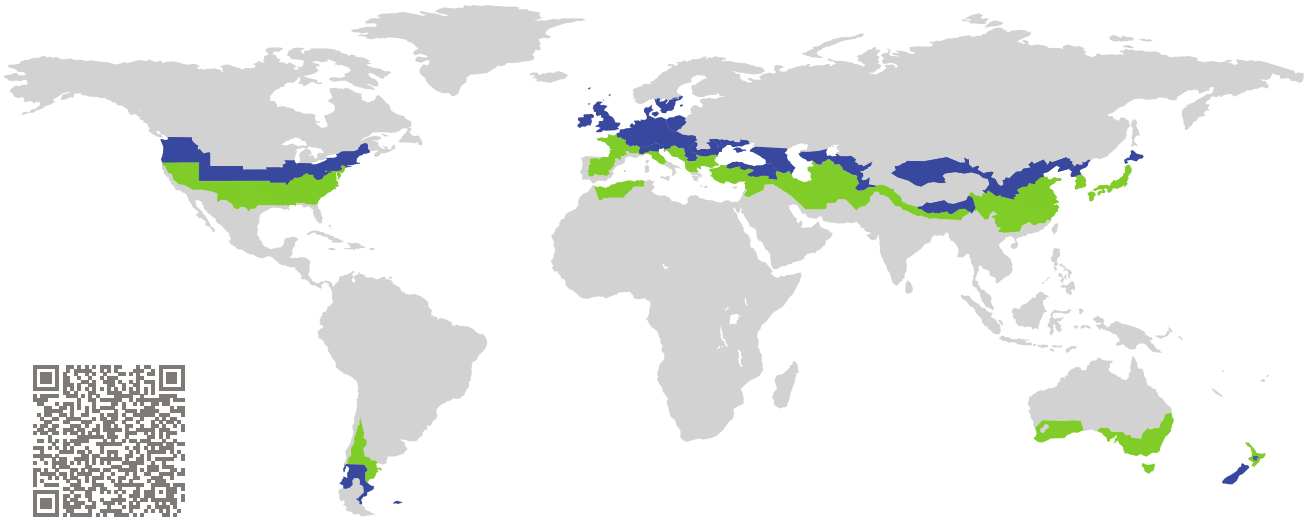
CERTIFICATE

Certified Passive House Component

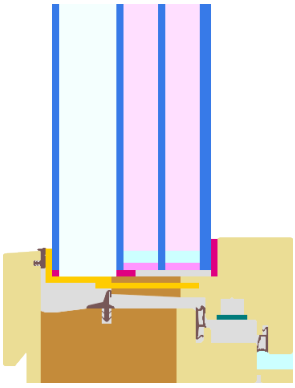
Component-ID 1434wi03 valid until 31st December 2025

Passive House Institute
Dr. Wolfgang Feist
64283 Darmstadt
Germany



Category:	**Window Frame**
Manufacturer:	**EuroFinestra s.a.s., Governolo di Roncoferraro, Italy**
Product name:	**ZEN**

This certificate was awarded based on the following criteria for the cool, temperate climate zone



Comfort	U_W = 0.68	≤	0.80 W/(m² K)
	$U_{W,installed}$	≤	0.85 W/(m² K)
	with U_g [1]	=	0.62 W/(m² K)
Hygiene	$f_{Rsi=0.25}$	≥	0.70

[1] The specified U_g value is determined using the reference glazing of the climate zone in conjunction with the additional pane.

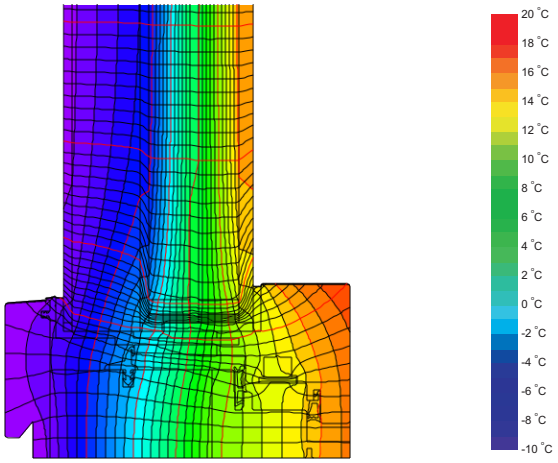
Calculation model



Isothermal

Description

Timber-cork frame (softwood 0,13 W/mK, cork 0,045 W/mK). Frame width 77 mm. Tripe glazing with integral shading in 30 mm air gap: 4/18Ar/4/18Ar/6; additional 4 mm pane to the outside. Spacer: Super Spacer TriSeal / T-Spacer Premium with polysulfide secondary seal.

Explanation

The window U-values were calculated for the test window size of 1.23 m × 1.48 m with U_g = 0.70 W/(m² K). If a higher quality glazing is used, the window U-values will improve as follows:

Glazing[2]	U_g =	0.70	0.64	0.58	0.52	W/(m² K)
		↓	↓	↓	↓	
Window	U_W =	0.68	0.65	0.61	0.57	W/(m² K)

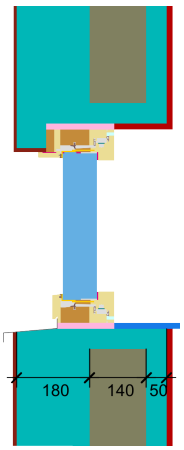
Transparent building components are classified into efficiency classes depending on the heat losses through the opaque part. The frame U-Values, frame widths, thermal bridges at the glazing edge, and the glazing edge lengths are included in these heat losses. A more detailed report of the calculations performed in the context of certification is available from the manufacturer.

The Passive House Institute has defined international component criteria for seven climate zones. In principle, components which have been certified for climate zones with higher requirements may also be used in climates with less stringent requirements. In a particular climate zone it may make sense to use a component of a higher thermal quality which has been certified for a climate zone with more stringent requirements.

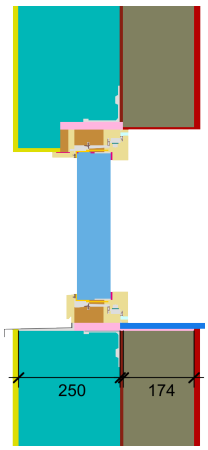
Further information relating to certification
can be found on www.passivehouse.com and passipedia.org.

[2]The specified U_g values refer to the thermally decisive glazing.

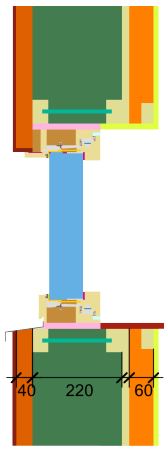
Validated installations

Formwork blocks (operable)	
U_{Wall} = 0.15 W/(m² K)	
	


$\Psi_{install}$	W/(m K)
Top	0.004
Side	0.004
Bottom	0.012
$U_{W,installed}$ = 0.70 W/(m² K)	

Exterior insulation and finishing system	
U_{Wall} = 0.13 W/(m² K)	
	


$\Psi_{install}$	W/(m K)
Top	0.019
Side	0.019
Bottom	0.042
$U_{W,installed}$ = 0.76 W/(m² K)	

Lightweight timber (operable)	
U_{Wall} = 0.13 W/(m² K)	
	


$\Psi_{install}$	W/(m K)
Top	0.013
Side	0.013
Bottom	0.019
$U_{W,installed}$ = 0.73 W/(m² K)	

Frame values		Frame width b_f mm	U-value frame U_f W/(m² K)	Ψ-glazing edge Ψ_g W/(m K)	Temp. Factor $f_{Rsi=0.25}$ [-]
Flying Mullion	(FM1) 	100	0.62	0.026	0.77
Bottom	(OB1) 	77	0.55	0.028	0.77
Top	(OH1) 	77	0.54	0.041	0.75
Lateral	(OJ1) 	77	0.54	0.028	0.77
Spacer: Super Spacer TriSeal / T-Spacer Premium				Secondary seal: Polysulfide
