

Project Documentation – Detached single family house in Guriezo, Spain

1 Abstract

RED DOOR HOUSE - Detached single family house in Guriezo

1.1 Data of building

Year of construction/ Baujahr	2017	Space heating / Heizwärmebedarf	15 kWh/(m²a)
U-value external wall/ U-Wert Außenwand	0.217 W/(m ² K)		
U-value floor slab/ U-Wert Fußboden	0.319 W/(m ² K)	Primary Energy Renewable (PER) / Erneuerbare Primärenergie (PER)	38 kWh/(m ² a)
U-value roof/ U-Wert Dach	0.168 W/(m ² K)	Generation of renewable energy / Erzeugung erneuerb. Energie	-
U-value window/ U-Wert Fenster	1.19 W/(m ² K)	Non-renewable Primary Energy (PE) / Nicht erneuerbare Primärenergie (PE)	84 kWh/(m ² a)
Heat recovery/ Wärmerückgewinnung	82 %	Pressure test n ₅₀ / Drucktest n ₅₀	0.59 h ⁻¹
Special features/ Besonderheiten			

1.2 Brief Description of the Project

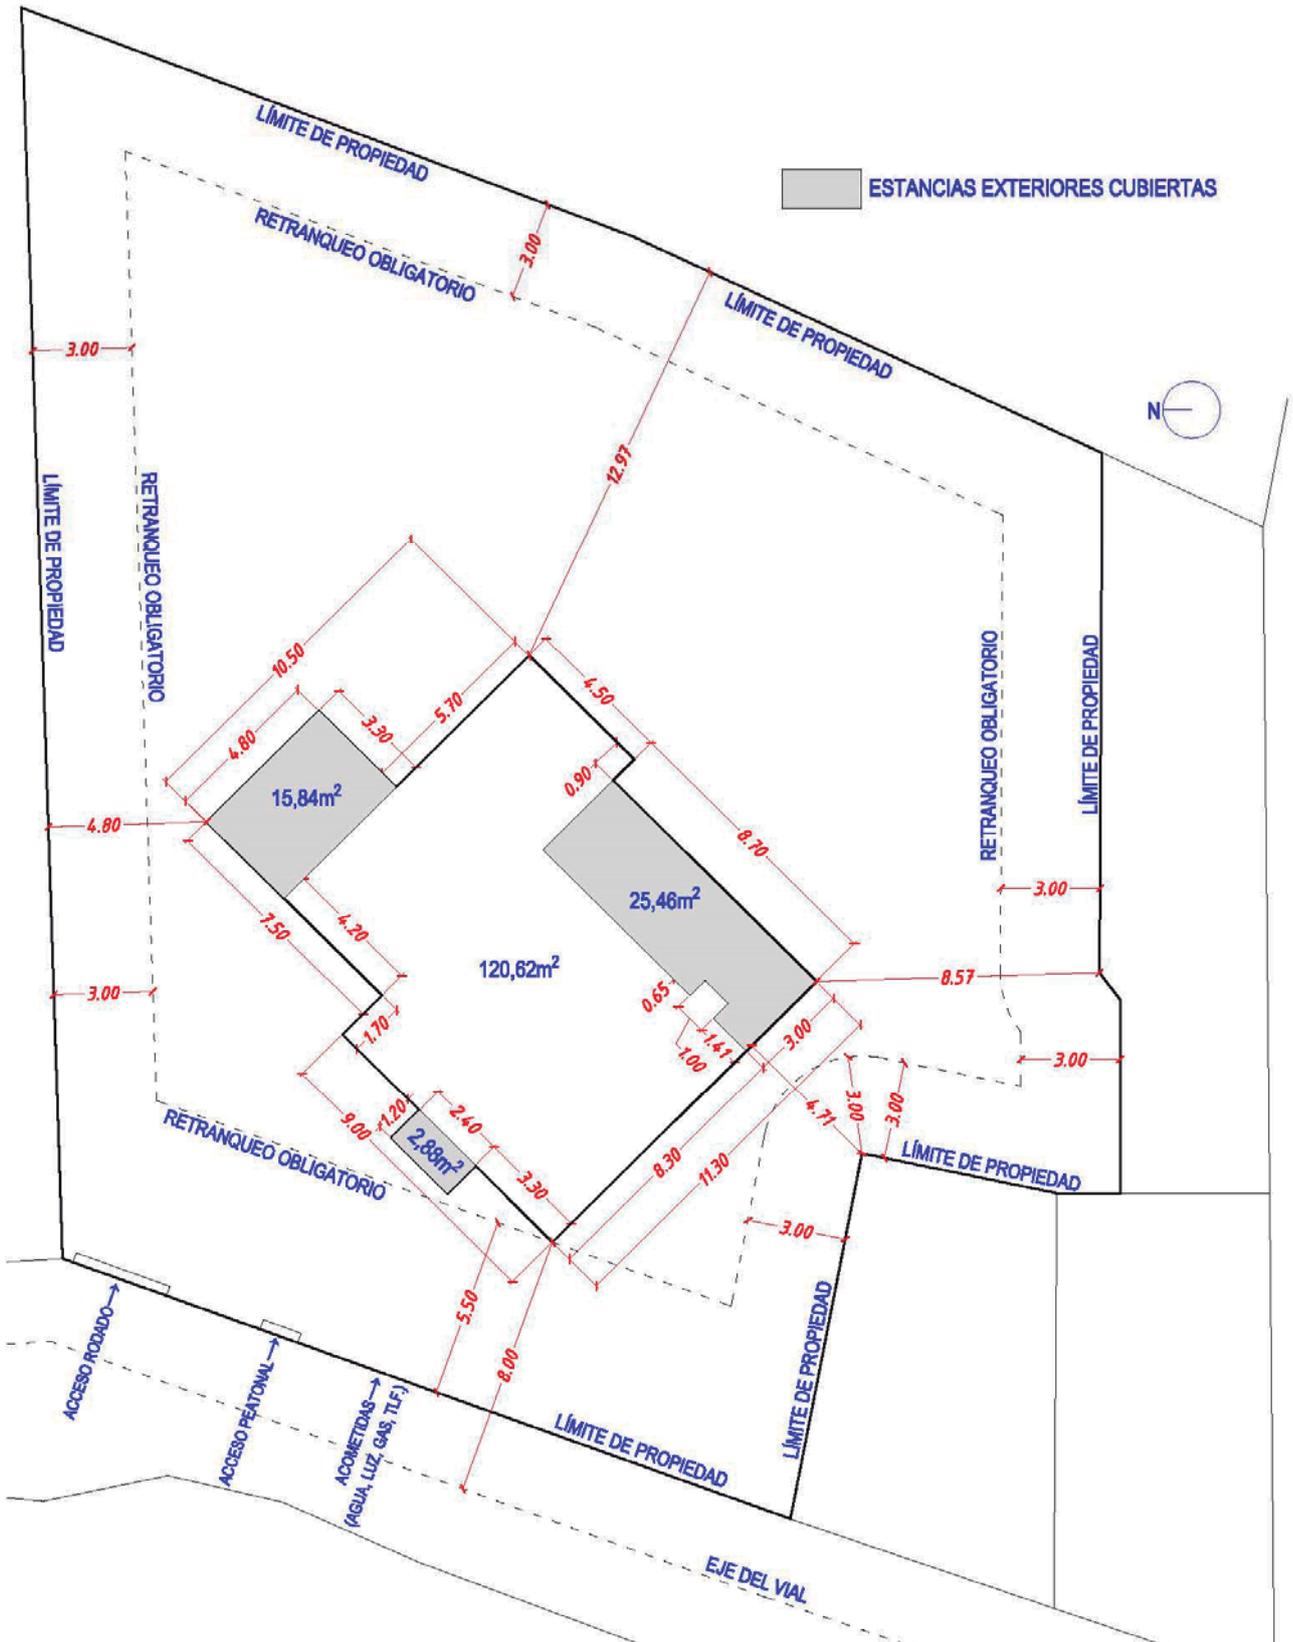

"Red Door House" This a detached house is located in Guriezo (Cantabria), a small town 55km away from Bilbao (Spain). The climate in this area is quite steady along the year due to its proximity to the sea, being low temperatures the main problem to be solved.

The project divides the 181m2 treated floor area in two storeys. In addition, there is a large south-oriented porch which provides enough shadow during summer.

The constructive system chosen is timber framing with mineral wool insulation within it. Triple glazing windows and the lack of nearby buildings, and therefore significant shadows, ensure a low heating demand.

South view

2.2 Photographs of the inside

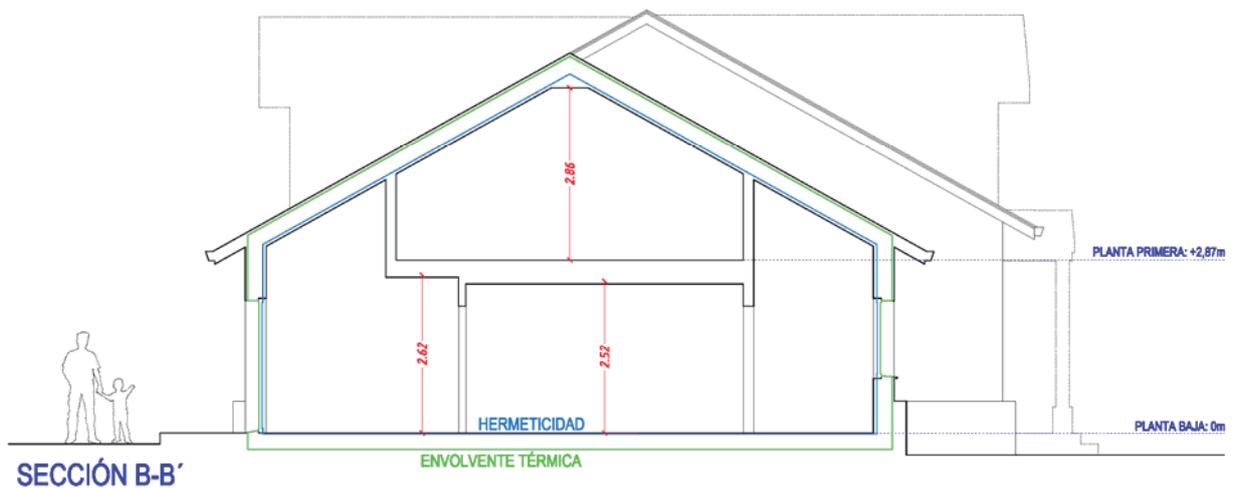

Living room, stairs, bedrooms, hallways

3 Sectional Drawing

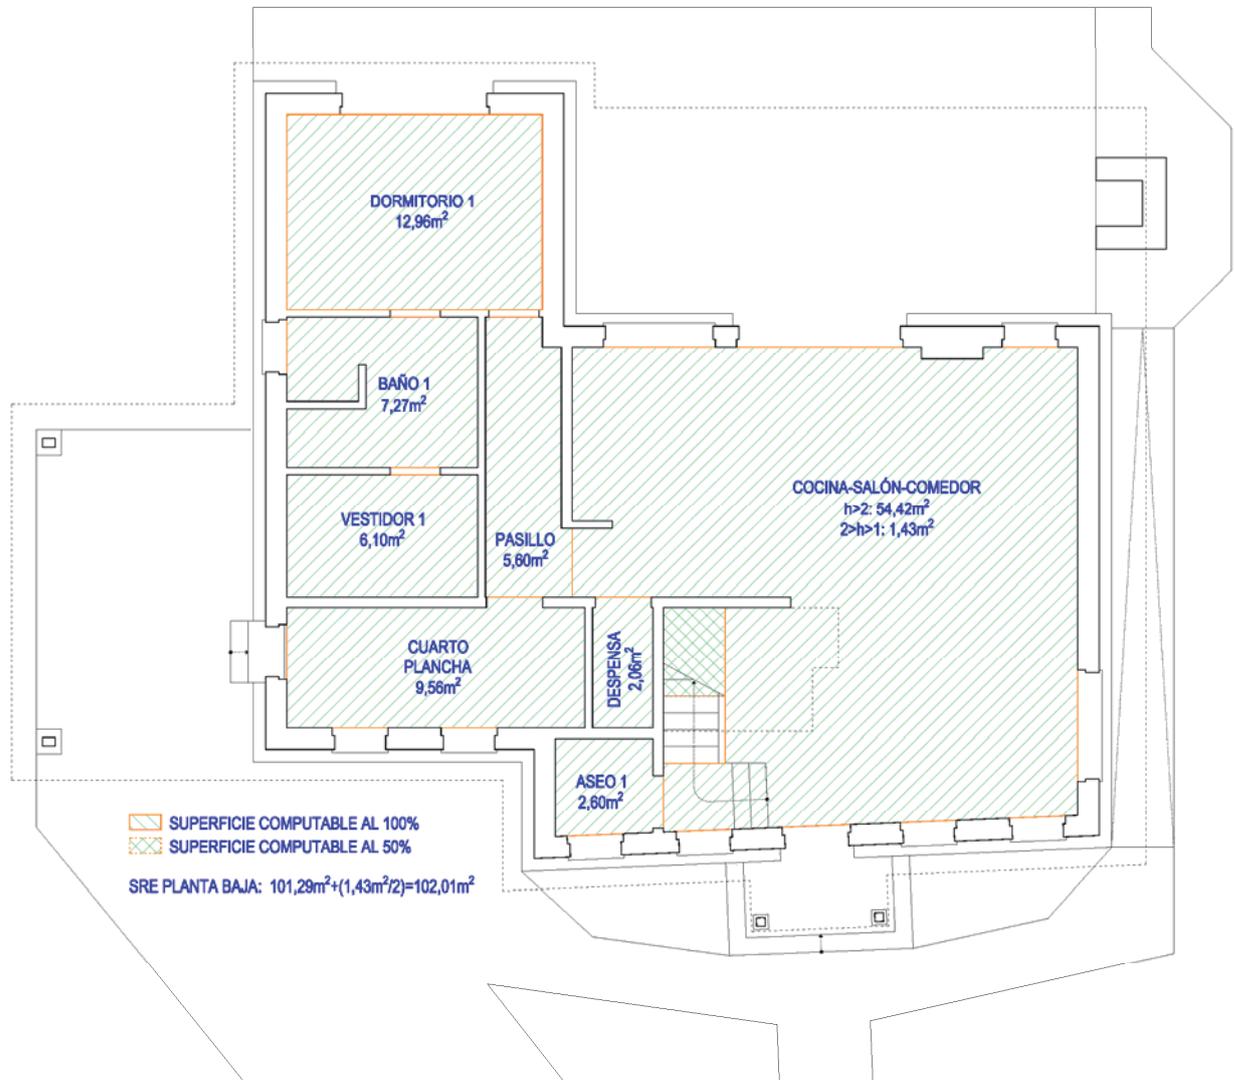

The passivhaus “Red Door House” divides its surface in two floors above the ground-level. The construction system chosen for the house was timber-framing with insulation between the battens. The roof is double sided and it has three dormers. The thermal envelope is marked in the section with a green line and the blue line marks the air tightness line.

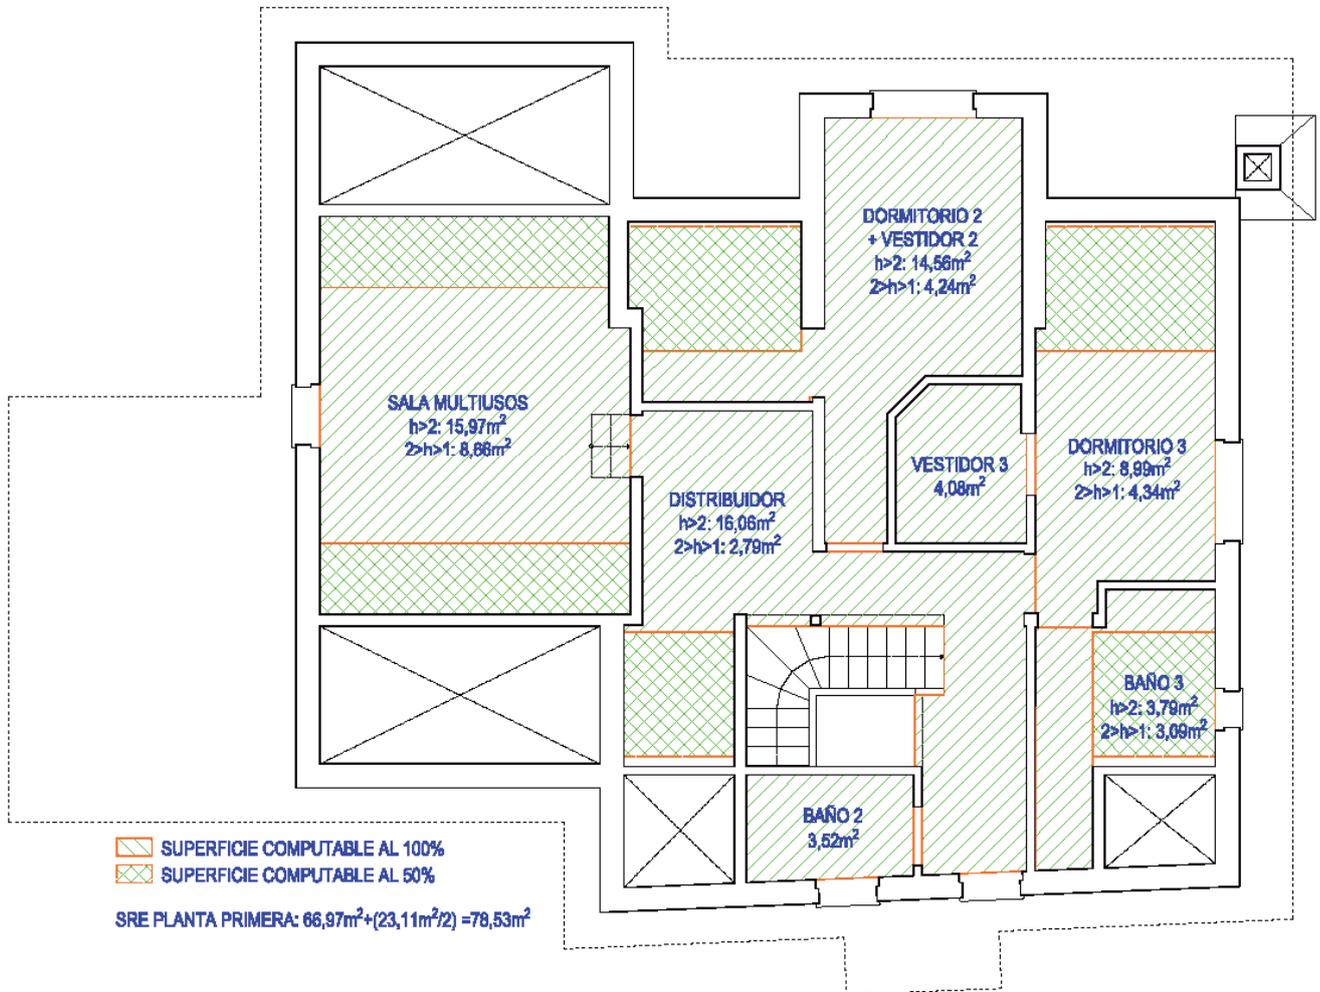

4 Plans

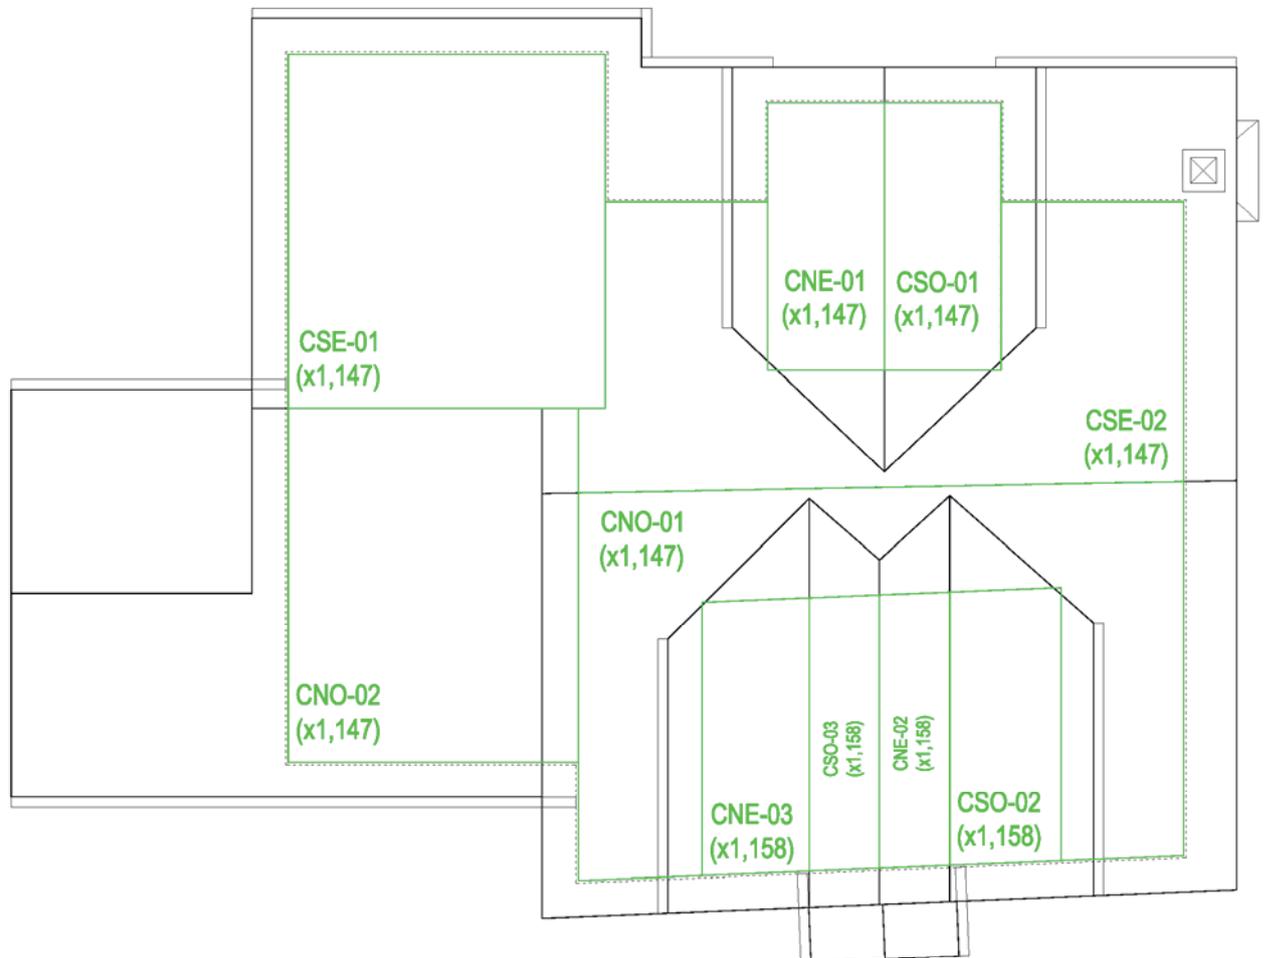

TFA is shown in the following plans:

Ground floor

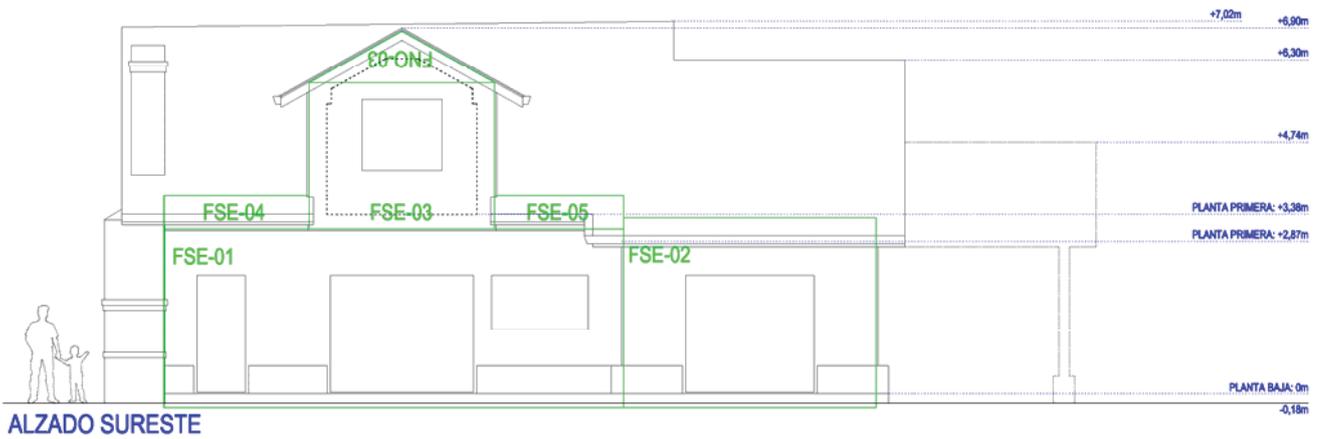

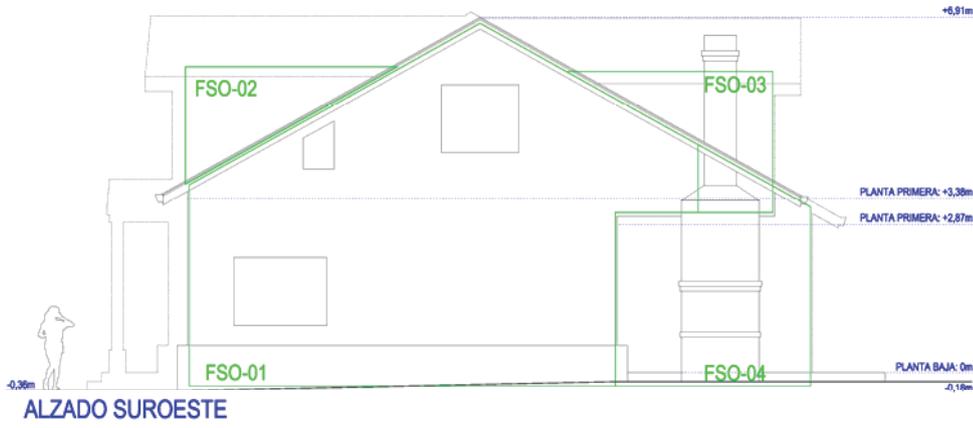

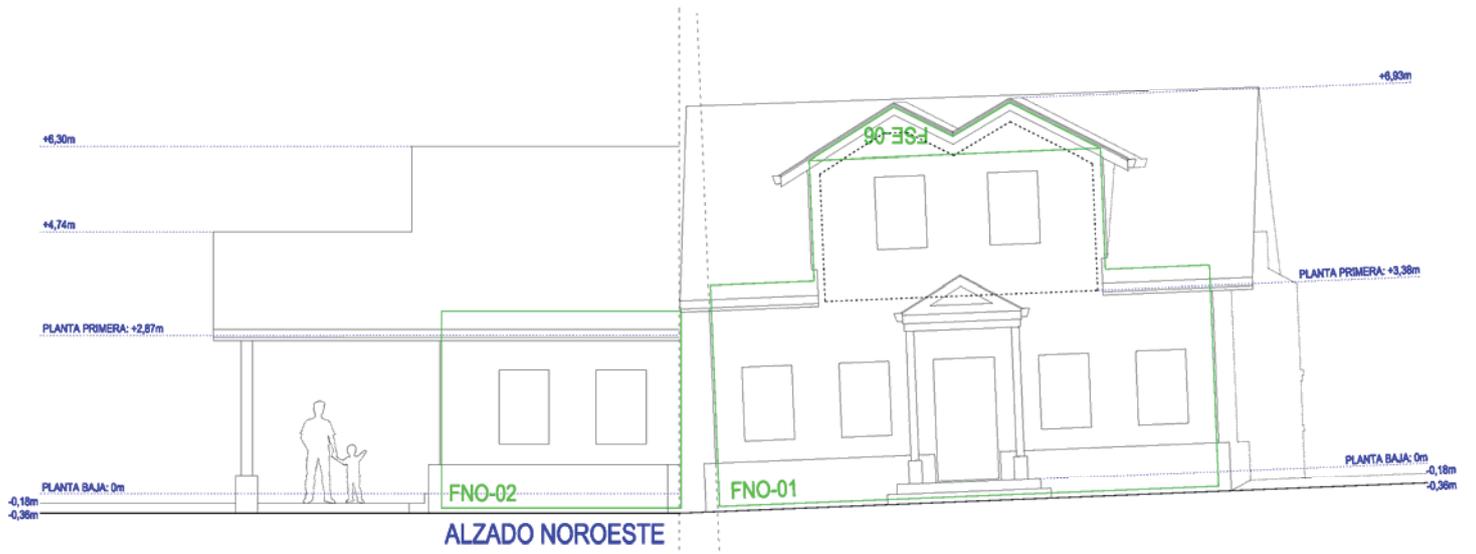

Roof floor:

The common areas are placed in the ground floor whereas the more private rooms are located in the first floor.

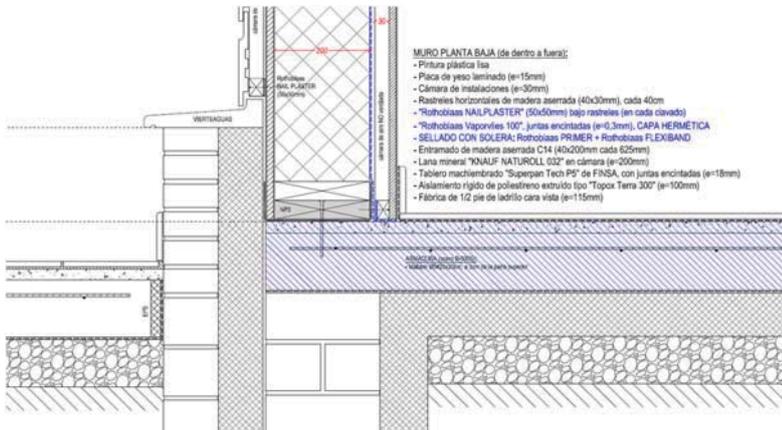

Elevations:

5 Technical details of the construction

5.1 Floor Slab

(top>bottom)

- 12mm wooden flooring
- 5mm polyethylene foam (05)
- 25mm mortar
- 120mm reinforced concrete slab
- 100mm XPS insulation (036) (Topox XPS)

100mm XPS insulation (036) around the floor slab perimeter.

U-value = 0.319 W/(m²K)

5.2 Exterior walls

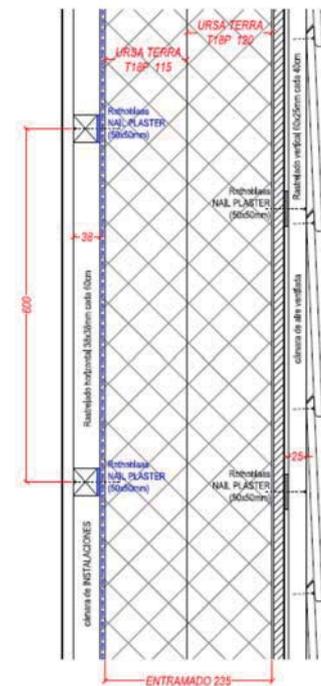

(in>out)

- 15mm gypsum plasterboard
- 38mm service void between timber battens (10%)
- Air tight membrane ('Rothoblaas Vaporvlies 85')
- 235mm mineral wool insulation (035) ('KNAUF Naturroll 035') between timber frame (18%)
- 18mm OSB-3

Wind tight membrane, MDF cladding fixed on external timber battens.

Different structures average: U-value=0,235 W/(m²K)

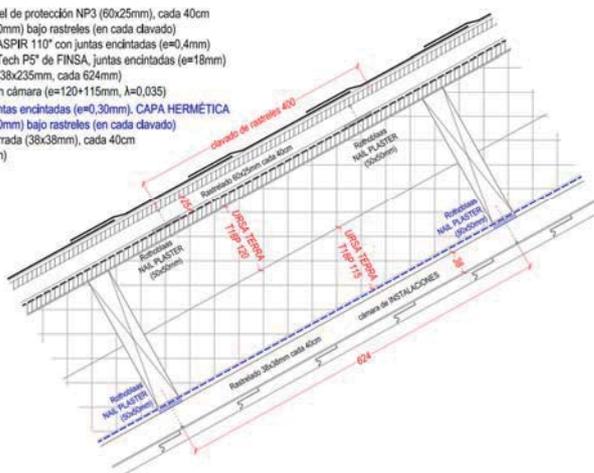

U-value = 0.195 W/(m²K)

5.3 Roof

CUBIERTA FRISO (de arriba a abajo):

- Tegola asfáltica "NBP DAKOTA 2 Tone Black"
- Filtro volcánico (e=5mm)
- Tablero OSB-3 (e=12mm)
- Rastreles verticales de madera. Nivel de protección NP3 (60x25mm), cada 40cm
- "Rothoblaas NAIL PLASTER" (50x50mm) bajo rastreles (en cada clavado)
- Lámina transpirable "Rothoblaas TRASPR 110" con juntas encintadas (e=0.4mm)
- Tablero machlembrado "Superpan Tech PS" de FINSA, juntas encintadas (e=18mm)
- Viguetas de madera aserrada C24 (38x235mm, cada 624mm)
- Lana mineral "URSA Terra T18P" en cámara (e=120x115mm, λ=0.035)
- "Rothoblaas Vaporvlies 100" con juntas encintadas (e=0.30mm), CAPA HERMÉTICA
- "Rothoblaas NAIL PLASTER" (50x50mm) bajo rastreles (en cada clavado)
- Rastreles verticales de madera aserrada (38x38mm), cada 40cm
- Friso de abeto "Softline" (146x19mm)

(in>out)

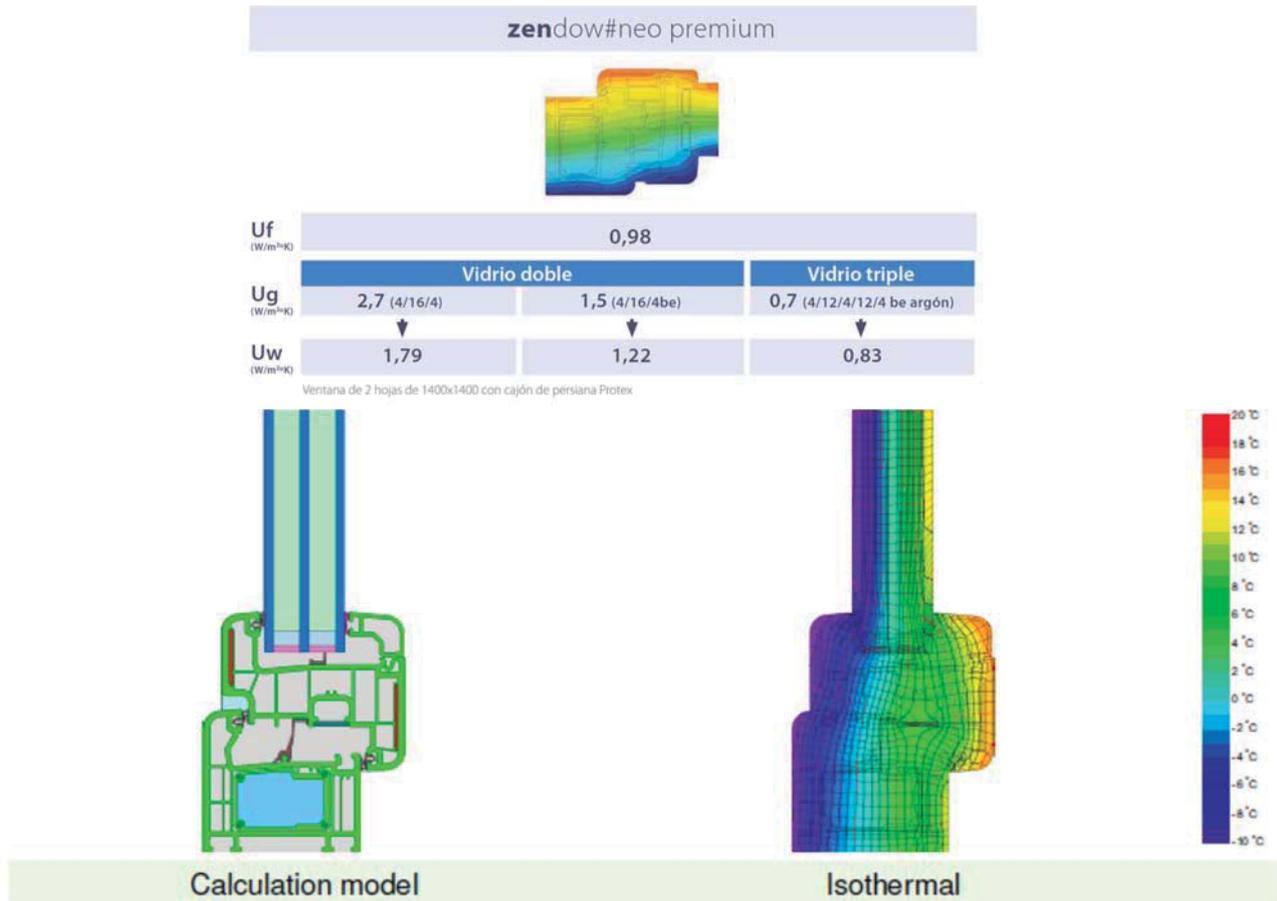

- 19mm wooden plank ceiling
- 38mm void between timber battens (10%)
- Air tight membrane ('Rothoblaas Vaporvlies 85')
- 140mm mineral wool insulation (032) ('KNAUF Naturroll 035') between timber frame (9%)
- 18mm OSB-3

Wind tight membrane, 9mm OSB-3 fixed on external timber battens, asphaltic roof tiles.

U-value = 0.164 W/(m²K)

5.4 Windows

5.4.1 Window Frame

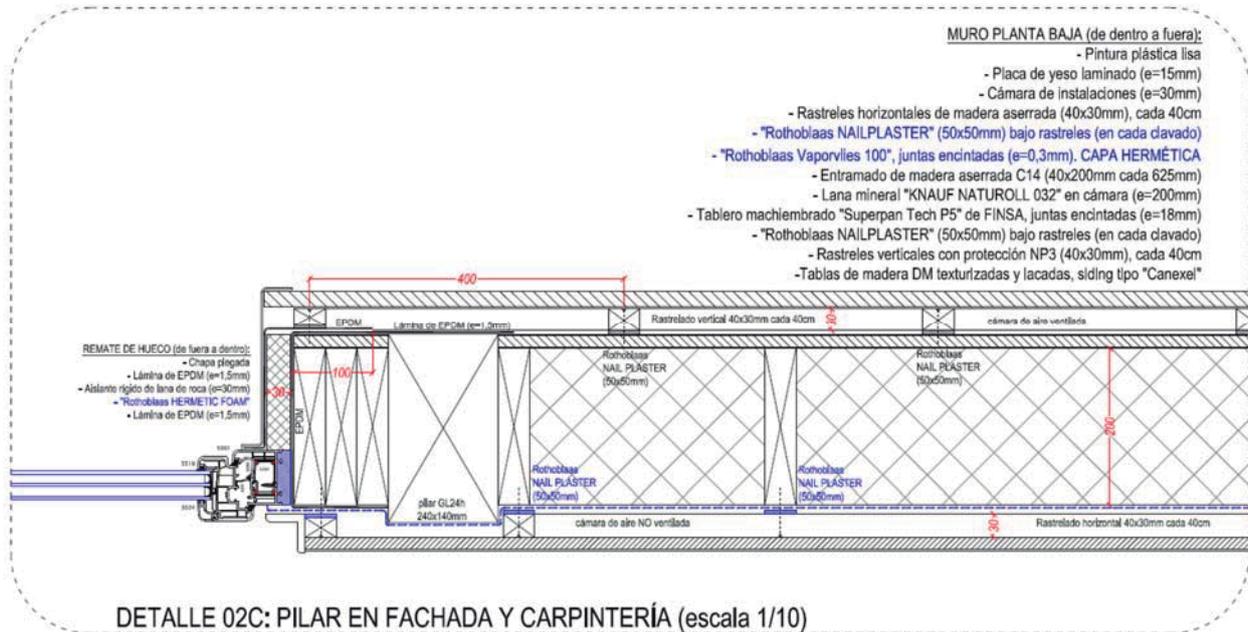

5.4.2 Glass

Type	U-Value	g-value
Saint-Gobain Glass Germany (4/20/4/20/3+3 Ar 90%)	0.5 W/m ² K	0.53

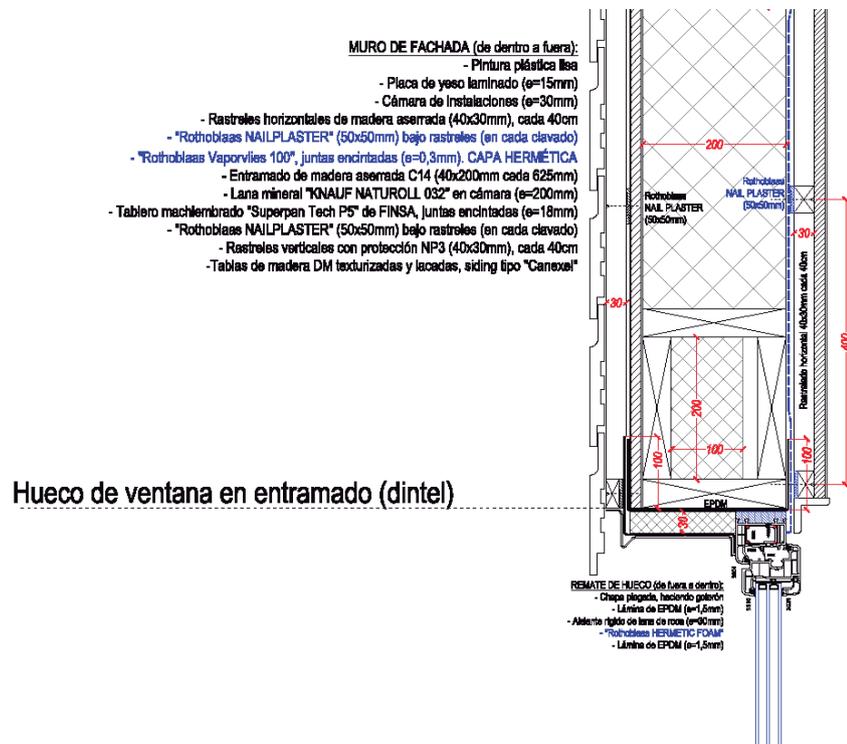

5.4.3 Window installation detail

8 Building Services

8.1 Heating

Batería eléctrica, toalleros eléctricos en los baños y una chimenea de bioetanol.

An electric battery, electric towel-heaters and a bioetanol chimney have been installed to provide the necessary heating load.

Comfopost - Batteria elettrica

Caratteristiche tecniche

- Materiale: lamiera zincata
- Materiale corpo scaldante: AISI 304
- Protezione: IP44
- Voltaggio: 230 V
- Termostato di sicurezza senza riarmo automatico
- Diametri e portate:
 - DN 125 mm per max 225 mc/h
 - DN 160 mm per max 350 mc/h
 - DN 200 mm per max 550 mc/h
- Potenza:
 - 500 W DN 125 mm cod.990315512
 - 500 W DN 160 mm cod.990210190
 - 1000 W DN 160 mm cod.990315116
 - 1000 W DN 200 mm cod.990315120
 - 2000 W DN 160 mm cod.990315216
 - 2000 W DN 200 mm cod.990315220

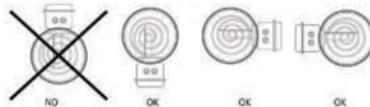

Schema elettrico

Istruzioni di montaggio

La batteria deve essere installata secondo le normative locali e la UN EN 60335-1.

L'installazione deve essere fatta tramite un interruttore bipolare con distanza tra i contatti superiore ai 3 mm.
L'installazione deve essere fatta in modo che a resistenza accesa sia garantito un flusso dell'aria di almeno 2 m/s.
La batteria non deve mai essere installata con il corpo di regolazione posizionato in alto.

8.2 Domestic hot water

House's hot water demand is covered by a heat pump from Junkers "Supraeco W".
