Category: **Entry door(opaque)**  
Manufacturer: **SC AGER-UNIKAT**  
**Intorsura Buzaului**  
**Romania**  
Product name: **Blue Diamond ENTRY by UNIKAT**

**This certificate was awarded based on the following criteria for the cool, temperate climate zone**

Comfort  $U_D = 0.68 \leq 0.80 \text{ W}/(\text{m}^2 \text{ K})$   
 $U_{D, \text{installed}} \leq 0.85 \text{ W}/(\text{m}^2 \text{ K})$   
with  $U_{\text{door leaf}}^1 = 0.38 \text{ W}/(\text{m}^2 \text{ K})$

Hygiene  $f_{Rsi=0.25} \geq 0.70$   
Airtightness  $Q_{100} = 2.11 \leq 2.25 \text{ m}^3/(\text{h m})$

## Description

Door made of aluminium, thermally separated with glass fibre-reinforced plastic (25% glass fibre, 0,30 W/(mK)), insulated with Kooltherm phenolic foam (0,022 W/(mK)) and polyethylene foam (0,038 W/(mK)). Door leaf insulation: EPS (0,035 W/(mK)). Threshold: glass fibre-reinforced plastic (25% glass fibre, 0,30 W/(mK)). The door meets airtightness class 3 according to DIN EN 12207:2017-03.

## Explanation

The U-values of the door apply to a door 1.10 m wide by 2.20 m tall.

A detailed report of the calculations performed in the context of certification is available from the manufacturer.

Unless stated otherwise, the air tightness was determined according to EN 1026 with respect to the joint length under climate load in conjunction with EN 1121 for the closed, non-locked door. The result corresponds at least to air-tightness class 3 according to EN 12207.

The Passive House Institute has defined international component criteria for seven climate zones. In principle, components which have been certified for climate zones with higher requirements may also be used in climates with less stringent requirements. In a particular climate zone it may make sense to use a component of a higher thermal quality which has been certified for a climate zone with more stringent requirements.
